Available for Sale or Lease
in the following sizes:

20' x 8'6" x 8'

40' x 8'6" x 8'

40' x 9'6" x 8'

If you are looking for extra cold storage space why not let us provide your company with an extremely economical option?

CTRC is a trading company established in Montreal, Canada in 1975, which supplies all types of ISO marine refrigerated containers to regional and international markets.

CTRC researches the international market to select top quality "secondhand" reefer containers equipped with Carrier or Thermo King Refrigeration machinery from leasing companies and shipping lines. All reefers are sold with their original PTI certificates.

These selected reefer containers are then reconditioned utilizing original Carrier or Thermo King Parts for the refrigeration machinery. The containers are PTI inspected ensuring good working order.

All reefer containers are fully serviced and in excellent working condition. These reefers are ready to provide temperature-controlled storage for cargo that must be refrigerated. The reefers, which we sell, will normally have a useful working life of an additional 5-10 years.

Each reefer container is reconditioned to the following standards:

- > Complete reefer body is repaired and suitable for refrigerated cargo
- > Reefer body is cleaned and painted if required
- > Interior of container is high pressure steam cleaned
- > Refrigeration machinery is serviced using authorized replacement parts
- > Container is CSC Plated for 5 years
- > A full pre-trip inspection (PTI) is performed by certified mechanics
- > A retrofit service from R12 to R409a or R134a is an option

CTRC also supplies diesel generator sets if your company requires to power reefers with generators in case of power failure.

Specifications

ISO dimensions* are followed throughout all containers.

C.T.R.C Services Ltd.	Length		Height		Width		Door Opening	
Container Types	Exterior	Interior	Exterior	Interior	Exterior	Interior	Height	Width
